Frontiers in CNS Drug Discovery (Volume 2)

www.ebooks.benthamscience.com/book/9781608057672

About the eBook

This eBook series is devoted to publishing the latest advances contributed by eminent researchers in Central Nervous System (CNS) drug design and discovery.

Contents

- ▶ Developing Treatments for Prion Diseases and Implications for Other Protein Misfolding Disorders
- ▶ Epigenetic Modifications as Novel Targets for Drug Addiction
- ▶ Manipulation of Endogenous Neural Stem Cells as a Therapeutic Strategy for Neurodegenerative Diseases: Insights from Animal Models
- ▶ New Therapies for HIV-1-Associated Neurocognitive Disorder (HAND): Animal Models and Gene Delivery of Antioxidant Enzymes by rSV40
- ▶ Transient Receptor Potential Ion Channels as Promising Therapeutic Targets: An Overview
- ▶ Antipsychotic Polypharmacy in Schizophrenia, from Empirical Associations to Combined Selective Treatments
- ▶ The Role of Natural Products on the Discovery of New Drug Candidates for Neurodegenerative Disorders
- ▶ Flavonoids – Their Preventer and Therapeutic Applications Against Parkinson's Disease
