Aims & Scope

Letters in Drug Design & Discovery publishes letters, full-length/mini-reviews, research articles, highlights and guest edited thematic issues in all areas of rational drug design and discovery including medicinal chemistry, in-silico drug design, combinatorial chemistry, high-throughput screening, drug targets, and structure-activity relationships. The emphasis is on publishing quality papers very rapidly by taking full advantage of the latest Internet technology for both the submission and review of manuscripts. The journal is an essential reading to all pharmaceutical scientists involved in research in drug design and discovery.
