Minimally Invasive Techniques for the Treatment of Patients with Structural Heart

www.ebooks.benthamscience.com/book/9781608051199

About the eBook

Historically, patients with advanced structural heart disease have required major surgery to correct the defect. This e-book outlines the current situation with respect to minimally invasive treatment of a wide range of structural cardiac defects. Indications for procedures as well as details of the procedures are also provided wherever possible.

Contents

- ▶ Percutaneous Closure of Patent Foramen Ovale (PFO)
- ▶ Percutaneous Closure of Atrial Septal Defects in Adults
- ▶ Transcatheter Aortic Valve Implantation
- ▶ Valvuloplasty
