Molecular Oncology: Principles and Recent Advances

www.ebooks.benthamscience.com/book/9781608050161

About the eBook

Understanding the molecular aspects of cancer development, the discovery of new molecular targets and rational drug design on this molecular basis should help in discovering early cancer biomarkers as well as novel therapeutic drugs. This book describes various cancer topics on a molecular level and integrates information on the relationship between causes of cancer, cancer cell biology, metastasis, cancer prevention and drug design.

Contents

- ▶ Cell Proliferation, Differentiation and Apoptosis
- ▶ I. The Influence of the Environment
- ▶ II. Obesity and Cancer
- ▶ III. Estrogens and Cancer
- ▶ IV. Example 1: Hepatocellular Carcinoma
- ▶ V. Example 2: Estrogens, Retinoids and Cervical Cancer Development
- ▶ Oncogenes and Tumor Suppressor Genes
