Artificial Adaptive Systems in Medicine New Theories and Models for New Applications in the Real World

www.ebooks.benthamscience.com/book/9781608050420

About the eBook

This eBook covers emerging theories on artificial intelligence applications in a variety of medical problems. Both theoretical and applied aspects are presented in this book. Many illustrative mathematical explanations and worked-out examples are given. This book features contributions by nine noted experts from leading medical centers worldwide.

Contents

- The General Philosophy of Artificial Adaptive Systems

- A Brief Introduction to Artificial Neural Networks

- A Brief Introduction to Evolutionary Algorithms and the Genetic Doping Algorithm

- Auto-Contractive Maps, H Function and Maximally Regular Graph - Theory

- Auto Contractive Maps, H Function and Maximally Regular Graph - Application
