Molecular Mechanism and Morphology in Cancer

www.ebooks.benthamscience.com/book/9781608050734

About the eBook

Cancer research has seen remarkable advances, including the multi-step carcinogenesis theory and the identification of a cancer stem cell. The Ebook contains articles written by specialists in oncology and covers a multidisciplinary explanation of advances in this field.

Contents

- ▶ Gastrointestinal Stromal Tumors: Mutations of Receptor Tyrosine Kinases and Morphology
- ▶ Chemotherapy in malignant gliomas
- ▶ The Role of Bcl-2 in Breast Cancer
- ▶ ETS Gene Fusions in Prostate Cancer
- ▶ New Types of Cell Death: Morphological and Molecular Characteristics
- ▶ Thyroid Cancer: Gene Mutation and Morphology of Follicular Cell Carcinomas
