Cancer Preventive and Therapeutic Compounds: Gift From Mother Nature

<https://ebooks.benthamscience.com/book/9781681084916/>

About the eBook

This ebook focuses on chemopreventive and anti-cancer activities of different natural/dietary compounds present in fruits, vegetable, spices, legumes, nuts, grains, and cereals. Contributions from authors around the world highlight the potential use of such derivatives against cancer treatment by presenting updated information of their biochemical mechanisms.

Contents

- Dietary Agents: Effective and Safe Natural Assets Against Cancer
- Medicinal Importance of Allicin - A Bioactive Component from *Allium Sativum L* (Garlic)
- Boswellic Acids as Potential Cancer Therapeutics
