## About the eBook

Acute and chronic liver disease is a global endemic healthcare concern. More than 500 million people around the world are infected with the hepatitis B or C virus. Approximately 500,000 patients die of hepatocellular carcinoma every year, implying that trained healthcare professionals and facilities for liver disease patients is a critical issue. Although promising therapies have been developed for viral hepatitis infections, management of liver cirrhosis, and hepatocellular carcinoma yet many patients suffer due to lack of adequate healthcare by professional hepatologists. This means that primary care physicians should be informed about diagnosing liver disease and the early management of viral hepatitis and hepatocellular carcinoma. Comprehensive Practical Hepatology provides readers current standard primary care guidelines for treatment and early stage management of patients with liver function abnormalities

## Contents

- Symptoms and Signs Suggestive of Liver Disease
- Diagnostic Strategies for Patients with Abnormal Liver Function Tests
- Approach to Patients with Acute Liver Injury
- Approach to Patients with Chronic Liver Injury
- Diagnostic Strategies and Treatment of Liver Tumors
- Liver Function Abnormalities in Systemic Disease
- Systemic Abnormalities in Liver Disease
- Infection and Liver
- Approach to Liver Injury Caused by Drugs and Toxins
- Risk of Surgery and Drug Therapy in Patients with Liver Disease
- Approach to Children with Abnormal Liver Function Tests Results
- Practical Management of Elderly Patients with Liver Injury
- Practical Management of Pregnant Women with Liver Injury
- Lifestyle Recommendation for Patients with Liver Diseases
- Medical Management of Patients Following Liver Transplantation
