About the eBook

"Frontiers in Medicinal Chemistry" is an E-book series devoted to reviews on research topics relevant to medicinal chemistry and allied disciplines. "Frontiers in Medicinal Chemistry" covers developments in rational drug design, bio-organic chemistry, high-throughput screening, combinatorial chemistry, compound diversity measurements, drug absorption, drug distribution, metabolism, new and emerging drug targets, natural products, pharmacogenomics, chemoinformatics, and structure-activity relationships. This E-book series is essential for any medicinal chemist who wishes to be updated on the latest and the most important advances in the field.

Contents

- ▶ Purinergic Receptors and Pain—An Update
- ▶ Human Diseases and Mitochondrial Damage: Role of Cytochrome c – Cardiolipin Interaction as a Key Regulator of Cell Fate
- ▶ Dipeptidyl Peptidase-4 (CD26): Knowing the Function before Inhibiting the Enzyme
- ▶ Peptides Interacting with Growth Factor Receptors Regulating Angiogenesis
- ▶ The Potential Application of Melanotropin Ligands for the Treatment of Obesity and Related Disorders: Potential and Problems
- ▶ Targeted Drugs and Nanomedicine: Present and Future
