Editor-in-Chief: Hui-Fen Wu Taiwan

ISSN: 2950-4902 (Online) ISSN: 2950-4910 (Print)

Aims & Scope

Current Spectroscopy and Chromatography is an international peer-reviewed scientific journal, that publishes full-length/mini-reviews, original research articles, and short communications in all core areas of fundamental and applied separation science, application of spectroscopy across all disciplines, including biology, chemistry, engineering, medicine, materials science, physics, and space science. Articles may contribute to fundamental research, or be highly applied, and must report important experimental results or relate to the development of new methods and instrumentation. All spectroscopic techniques lie within the scope of the journal.

The scope of the journal includes various modes of spectroscopy and chromatography, electrophoresis, and other related methods, hyphenated and other multi-dimensional techniques, sample preparation, and detection options such as mass spectrometry, infra-red spectroscopy, electron paramagnetic resonance, NMR spectroscopy, atomic spectroscopy and others.

The journal aims to cover major advances in both basic and applied separation science of relevance to chemical and biomedical disciplines.

- Publishing Peer Reviewed Articles Rapidly
- Indexed in Chemical Abstracts Service/SciFinder, EBSCO, CNKI Scholar, British Library and more...
- FREE Online Trials for Institutions
- FREE Sample Issues Available on Website
