Editor-in-Chief
Zongjin Li, China

ISSN: 2211-7385 (Print)
ISSN: 2211-7393 (Online)

Aims & Scope

Pharmaceutical Nanotechnology publishes original manuscripts, full-length/mini reviews, thematic issues, rapid technical notes and commentaries that provide insights into the synthesis, characterisation and pharmaceutical (or diagnostic) application of materials at the nanoscale. The nanoscale is defined as a size range of below 1 μm . Scientific findings related to micro and macro systems with functionality residing within features defined at the nanoscale are also within the scope of the journal. Manuscripts detailing the synthesis, exhaustive characterisation, biological evaluation, clinical testing and/or toxicological assessment of nanomaterials are of particular interest to the journal's readership. Articles should be self contained, centred around a well founded hypothesis and should aim to showcase the pharmaceutical/diagnostic implications of the nanotechnology approach.
